

PUMPS

## Frame-Mounted Centrifugal Pumps

Frame-Mounted Centrifugal Pumps are designed for the user who has a separate power source suitable for driving through couplings or with belts.

Ideal for all general purpose applications requiring high performance, moderate initial cost, and easy maintenance.

Cast iron construction with unique back pull-out design permits access to the impeller without disturbing the piping.

## Submersible Pumps

- 4" through 10" submersible turbine pumps.
- 1/2 to 200 hp.
- Flow capacities to 2,200 gpm.
- Heads to 1700 feet.
- Strainer screens.
- 50 cycle versions available.
